

GIN, SPIRITS & LIQUOR CATALOG 2024

ROBYMARTON

Marton's Gin is made from high-quality grain, spring water, and a little bit of Italian magic. The gin is double-filtered, creating a smooth, clean beverage. After the distillation process is complete, the spirit is poured into a container and cold infusion is performed.

This refinement gives the gin a bigger, fuller flavor and makes the texture even more pleasurable. It is important to note the unusual color of Marton's. The extraordinary characteristic, and the list of botanicals featured in this gin, help Marton's to stand out from the crowd. Citrus fruits, red fruits, cloves, ginger, horseradish, anise seed, coriander, pink pepper, and liquorice give this spirit a whole character of its own and make it unique in every possible way.

VERMOUTH- CONTRATTO

THE UNIQUE SECRET BEHIND A GREAT WINE IS AN EXCEPTIONAL GRAPE

The Rivettis found the land and climate in Bossolasco, a little town in Alta Langa, had the perfect characteristics for growing Pinot Noir and Chardonnay. Giorgio Rivetti decided to invest in these hills. He was convinced in the zone's characteristics, which has many similarities to vineyards in the Nebbiolo zones, would all ensure that the terroir would make the ideal place for the Contratto wines.
